REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Cummings, U.S. Patent No. 5,750,482, discloses a glass cleaning composition comprising 0.1-1% by weight of ethylene glycol monohexyl ether (see abstract and col. 3, lines 23-33), 1-5% by weight of a low boiling cosolvent, such as isopropyl alcohol (see col. 4, lines 22-29), 0.01-2% by weight of a surfactant, such as sodium dodecyl benzene sulfonate (see col. 5, lines 8-63), 0.01-2% by weight of an acid, such as citric acid, acetic acid, sulfamic acid, hydrochloric acid, phosphoric acid, and sulfuric acid (see col. 7, lines 5-15), a base, such as monoethanolamine, and 0.1-1% by weight of a builder and chelating agent, such as EDTA and sodium citrate (see col. 7, lines 30-49). Specifically, note Examples 1-10. However, patentee differs from applicant in that Cummings requires that their composition contains 0.1-1% by weight of ethylene glycol monohexyl ether, which is excluded from the instant claims with the transitional phrase "consisting of".

Accordingly, the claims viewed as a whole would not have been obvious to one of ordinary skill in the art at the time of the invention after viewing the prior art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
